Editorial Review

Review

"This second edition provides a very good overview of common medical complications in the IVF patient ... trainees and junior reproductive endocrinology and infertility specialists will find this book a good supplement to their clinical practice."

?Kenan Rifat Omurtag, MD for *Doody's Review Service*

From reviews of the first edition:

"This is a very apt and concise book on the subject ... but also provides evidence-based discussion of other complex situations such as managing hydrosalpinges and fibroids ... This book should be read by every specialist dealing with large numbers of patients undergoing IVF as they will encounter these patients and will benefit from up-to-date and accurate data presented here." (Highly Commended, Obstetrics & Gynaecology Category, 2006 BMA Medical Book Competition)

"This book attempts to highlight an important but neglected area of practice. It is highly original and a much-needed resource for clinicians working in IVF and infertility units." (The Society of Authors and the Royal Society of Medicine Book Awards 2006)
