**Introducing LISREL: A Guide for the Uninitiated (Introducing Statistical Methods series)** By Adamantios Diamantopoulos, Judy A Siguaw

'If you encounter a research student for whom the very word LISREL induces feelings of fear, quietly recommend that they read this book. They will thank you for it. With increasingly user-friendly versions of LISREL being released and guide books such as this published, LISREL really should be accessible to all' - *European Journal of Marketing*

Emphasizing substantive issues rather than intricate statistical details, this book provides a comprehensive introduction to LISREL for structural equation modeling (SEM) using a non-technical, user-oriented approach that. The emphasis is on:

- exposing the reader to the major steps associated with the formulation and testing of a model under the LISREL framework
- describing the key decisions associated with each step
- highlighting potential problems and limitations associated with LISREL modeling

- assisting the interpretation of LISREL input and output files.

The overall aim is to provide a critical understanding of what is really involved in LISREL modeling and sensitize the reader against 'mechanically' fitting or modifying models.

The entire range of decisions associated with the practical application of the LISREL program is covered in a user-friendly fashion. Concrete examples are used throughout to illustrate issues relating to model conceptualization, specification, identification, estimation, evaluation, modification, and cross-validation and illustrated with actual program output.

The program is made much more accessible by adopting the more user-friendly SIMPLIS command language for preparing input files. Although primarily aimed at beginning users, readers are directed to further reading together with a comprehensive bibliography for the more advanced user.

## **Editorial Review**

### **Review**

'This is a good book because it does what it says on the tin, providing the uninitiated with an introduction to LISREL of quite exceptional clarity, but does so without patronising its readers or shying away from the fact that LISREL involves some fairly demanding statistics and that its successful application requires a rigorous approach to model formulation' - *International Journal of Market Research*

### **About the Author**

Adamantios Diamantopoulos joined the University of Vienna in February 2004 from Loughborough University Business School, UK, where he held the Chair of Marketing and Business Research. He was previously Professor of International Marketing at the European Business Management School, University of Wales Swansea, where he headed the Marketing Group. During 1996-1999 he also held the Nestlé Visiting Research Professorship of Consumer Marketing at Lund University, Sweden. Other past academic posts include full-time appointments at the University of Edinburgh and the University of Strathclyde, and Visiting Professorships at the University of Miami (USA), Vienna University of Economics and Business (Austria), Université Robert Schuman (France), Dortmund University (Germany), University of Bern (Switzerland), Athens Laboratory of Business Administration (Greece) and University of Leeds (UK). He has taught at fifteen university institutions in the UK, France, Belgium, Germany, Austria, Sweden, Switzerland, Spain, Greece, Slovenia and the USA and has collaborated with several international companies. In addition to his Chair at the University of Vienna, he currently holds a Visiting Research Professorship at Loughborough University, UK. He is also a visiting Professor at the Faculty of Economics, University of Ljubljana, Slovenia.

He holds a BA and MSc degree from Heriot-Watt University, a PhD degree from the University of Strathclyde and a DLitt degree from Loughborough University. In 2000, he was elected Fellow of the British Academy of Management.

Judy A. Siguaw is the Founding Dean of ACTE partner organization the Cornell-Nanyang Institute of Hospitality Management. Holding the position of Professor of Marketing in the School of Hotel Administration at Cornell University and the J. Thomas Clark Chair in Entrepreneurship and Personal Enterprise, Dr. Siguaw earned her doctorate in 1991 from Louisiana Tech University. She has been published in more than over 45 business and trade journals, contributed to four books and authored 29 conference papers. Dr. Siguaw's research interests include personal selling, sales management, customer relationships, channels of distribution, and marketing strategy. She is currently at work on numerous journal manuscripts in these areas, as well as a book on best practices in the Asian hospitality industry.

## **Users Review**

### **From reader reviews:**

#### **David Hogan:**

This book untitled Introducing LISREL: A Guide for the Uninitiated (Introducing Statistical Methods series) to be one of several books that best seller in this year, that is because when you read this book you can get a lot of benefit upon it. You will easily to buy that book in the book retailer or you can order it by way of

online. The publisher of this book sells the e-book too. It makes you more easily to read this book, since you can read this book in your Mobile phone. So there is no reason to you personally to past this reserve from your list.

**Robert Nguyen:**

The reserve untitled Introducing LISREL: A Guide for the Uninitiated (Introducing Statistical Methods series) is the reserve that recommended to you to study. You can see the quality of the publication content that will be shown to you. The language that article author use to explained their way of doing something is easily to understand. The article author was did a lot of analysis when write the book, so the information that they share for your requirements is absolutely accurate. You also could get the e-book of Introducing LISREL: A Guide for the Uninitiated (Introducing Statistical Methods series) from the publisher to make you far more enjoy free time.

**Paul Dixon:**

Often the book Introducing LISREL: A Guide for the Uninitiated (Introducing Statistical Methods series) has a lot details on it. So when you make sure to read this book you can get a lot of gain. The book was written by the very famous author. This articles author makes some research before write this book. This specific book very easy to read you will get the point easily after reading this book.

**Aracely Schneider:**

You can get this Introducing LISREL: A Guide for the Uninitiated (Introducing Statistical Methods series) by visit the bookstore or Mall. Simply viewing or reviewing it could to be your solve difficulty if you get difficulties on your knowledge. Kinds of this reserve are various. Not only by means of written or printed but can you enjoy this book through e-book. In the modern era including now, you just looking because of your mobile phone and searching what your problem. Right now, choose your own personal ways to get more information about your publication. It is most important to arrange you to ultimately make your knowledge are still change. Let's try to choose correct ways for you.
