Computer Networking: A Top-Down Approach, Global Edition From Pearson Education Limited

For courses in Networking/Communications

Motivates readers with a top-down, layered approach to computer networking

Unique among computer networking texts, the **Seventh Edition** of the popular *Computer Networking: A Top Down Approach* builds on the author's long tradition of teaching this complex subject through a layered approach in a "top-down manner." The text works its way from the application layer down toward the physical layer, motivating readers by exposing them to important concepts early in their study of networking. Focusing on the Internet and the fundamentally important issues of networking, this text provides an excellent foundation for readers interested in computer science and electrical engineering, without requiring extensive knowledge of programming or mathematics. The **Seventh Edition** has been updated to reflect the most important and exciting recent advances in networking.

About the Author

Jim Kurose is a Distinguished University Professor of Computer Science at the University of Massachusetts, Amherst. He is currently on leave from the University of Massachusetts, serving as an Assistant Director at the US National Science Foundation, where he leads the Directorate of Computer and Information Science and Engineering. Dr. Kurose has received a number of recognitions for his educational activities including Outstanding Teacher Awards from the National Technological University (eight times), the University of Massachusetts, and the Northeast Association of Graduate Schools. He received the IEEE Taylor Booth Education Medal and was recognized for his leadership of Massachusetts' Commonwealth Information Technology Initiative. He has been the recipient of a GE Fellowship, an IBM Faculty Development Award, and a Lilly Teaching Fellowship.

Dr. Kurose is a former Editor-in-Chief of IEEE Transactions on Communications and of IEEE/ACM Transactions on Networking. He has been active in the program committees for IEEE Infocom, ACM SIGCOMM, ACM Internet Measurement Conference, and ACM SIGMETRICS for a number of years and has served as Technical Program Co-Chair for those conferences. He is a Fellow of the IEEE and the ACM. His research interests include network protocols and architecture, network measurement, sensor networks, multimedia communication, and modeling and performance evaluation. He holds a PhD in Computer Science from Columbia University.

Keith Ross is the Dean of Engineering and Computer Science at NYU Shanghai and the Leonard J. Shustek Chair Professor in the Computer Science and Engineering Department at NYU. Previously he was at University of Pennsylvania (13 years), Eurecom Institute (5 years) and Polytechnic University (10 years). He received a B.S.E.E from Tufts University, a M.S.E.E. from Columbia University, and a Ph.D. in Computer and Control Engineering from The University of Michigan. Keith Ross is also the co-founder and original CEO of Wimba, which develops online multimedia applications for e-learning and was acquired by Blackboard in 2010.

Professor Ross's research interests are in security and privacy, social networks, peer-to-peer networking, Internet measurement, video streaming, content distribution networks, and stochastic modeling. He is an ACM Fellow, an IEEE Fellow, recipient of the Infocom 2009 Best Paper Award, and recipient of 2011 and 2008 Best Paper Awards for Multimedia Communications (awarded by IEEE Communications Society). He has served on numerous journal editorial boards and conference program committees, including IEEE/ACM Transactions on Networking, ACM SIGCOMM, ACM CoNext, and ACM Internet Measurement Conference. He also has served as an advisor to the Federal Trade Commission on P2P file sharing.

Users Review

From reader reviews:

Charles Lee:

The knowledge that you get from Computer Networking: A Top-Down Approach, Global Edition could be

the more deep you rooting the information that hide into the words the more you get thinking about reading it. It does not mean that this book is hard to be aware of but Computer Networking: A Top-Down Approach, Global Edition giving you enjoyment feeling of reading. The article author conveys their point in selected way that can be understood simply by anyone who read the idea because the author of this e-book is well-known enough. This kind of book also makes your own vocabulary increase well. So it is easy to understand then can go to you, both in printed or e-book style are available. We recommend you for having this kind of Computer Networking: A Top-Down Approach, Global Edition instantly.

Ronald Adams:

Would you one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Try to pick one book that you never know the inside because don't judge book by its deal with may doesn't work at this point is difficult job because you are afraid that the inside maybe not as fantastic as in the outside appear likes. Maybe you answer could be Computer Networking: A Top-Down Approach, Global Edition why because the great cover that make you consider concerning the content will not disappoint a person. The inside or content will be fantastic as the outside as well as cover. Your reading 6th sense will directly guide you to pick up this book.

Richard Byrnes:

This Computer Networking: A Top-Down Approach, Global Edition is great e-book for you because the content and that is full of information for you who also always deal with world and get to make decision every minute. This kind of book reveal it info accurately using great manage word or we can declare no rambling sentences in it. So if you are read the idea hurriedly you can have whole info in it. Doesn't mean it only provides you with straight forward sentences but difficult core information with lovely delivering sentences. Having Computer Networking: A Top-Down Approach, Global Edition in your hand like finding the world in your arm, data in it is not ridiculous 1. We can say that no e-book that offer you world inside ten or fifteen minute right but this e-book already do that. So , this really is good reading book. Heya Mr. and Mrs. occupied do you still doubt in which?

Tom Tucker:

Reading a book being new life style in this calendar year; every people loves to study a book. When you study a book you can get a large amount of benefit. When you read books, you can improve your knowledge, because book has a lot of information upon it. The information that you will get depend on what sorts of book that you have read. If you wish to get information about your research, you can read education books, but if you want to entertain yourself look for a fiction books, these kinds of us novel, comics, as well as soon. The Computer Networking: A Top-Down Approach, Global Edition will give you new experience in looking at a book.
