The Art and Science of Hand Reading: Classical Methods for Self-Discovery through Palmistry By Ellen Goldberg, Dorian Bergen

A comprehensive guide to the inner psychology revealed by the hand

- Details how to interpret the entire hand--the shape of the palm and fingers, mounts, lines, fingerprints, flexibility, nails, and skin texture
- Reveals the personality archetypes, strengths, and weaknesses connected with each of the seven mounts and how the rest of the hand modifies these traits
- Explains how lines change and the decisive influence of the person's own mind in healing defects found on the lines

Palmistry is a science and a universal language. The hand tells a story about your talents, relationships, health, and how you feel about yourself. It reveals periods of ease or challenge in your life, and it speaks about your weaknesses and the traits you need to develop. As you change, so do your hands, reflecting the progress you have made.

In this comprehensive guide to hand reading, based on Ellen Goldberg's 40 years of teaching palmistry and the Western Mystery tradition, the authors make the powerful insights of the hand accessible in an inviting and user-friendly manner. The book presents the character traits and personality archetypes associated with each of the seven mounts of the palm and shows how to determine which are most influential in the nature of the individual. The mount archetypes reveal the lifestyle, love, sex, and marriage preferences; the best career choices; and the unique strengths and weaknesses for each person. The book also examines other factors that enhance the qualities revealed by the mount types, including the flexibility of the hand, texture of the skin, and the shapes of the fingers, fingertips, and nails. The meaning of each major and minor line is described in detail as well as the influence the person's own mind has in healing defects and obstacles found on their lines. The authors also provide accurate timing guides for each line, making it possible to locate specific events and to see how your lines change over time.

Presenting the hand as a guide to self-fulfillment, *The Art and Science of Hand Reading* incorporates correspondences to other mystical sciences such as astrology, Kabbalah, the Hermetic teachings, and archetypal psychology. It also includes practical examples and more than 600 illustrations to show how to integrate the meanings of each part of the hand to form a complete picture of your inner psychology and your ever-changing destiny.

An Introduction to Hand Reading

In hand reading most information comes from the seven mounts and six major lines. The mounts--pads of flesh that rise and fall over the surface of the palm--vary in each individual hand. The most developed mounts in a hand show the dominant character traits of the individual. Each of these mounts represents an archetype; a personality pattern repeated since the dawn of time. The lines of the palm are the rivers of energy in the map of the hand. Each line represents a specific quality such as intelligence, vitality, and emotional capacity.

Many interesting variations in character are told by other factors such as those found in the fingers, skin, and nails. These are known as basic modifiers, which indicate variety and individuality within the mount types. Although we will cover each mount and line in depth, here is a simplified overview to get started.

Introduction to the Mounts

The names of the seven mounts mirror the seven celestial bodies of the ancients, gods of Greek and Roman mythology. When a mount stands up from the palm high and full, its influence is strong. Generally there are two dominant mounts that have equal influence on the personality, and the individual is a combination of the traits of both mounts. These interesting blends produce endless variations in human nature. The table below provides a summary of each mount.

The Lines of the Palm

There are six major lines and numerous minor ones. In this brief overview we will cover only the major lines. Both will be covered later in detail. Usually every hand has Head, Heart, and Life Lines. The lines of Saturn, Apollo, and Mercury, while considered major lines, appear less frequently. When judging a line, the depth of the channel it cuts and the clarity of the line determine its strength. When a line is deep and clear, the aspect represented by the line is functioning well. When a line is thin or broken, that aspect of the individual is weak or challenged. Do not be frightened by a delicate line. Lines change more easily than any other part of the hand. They are there for guidance and change as we change. Their ability to change shows us that fate is fluid.

The Major Lines

The Heart Line indicates the physical state of the heart and the emotional capability of the individual. The line begins near the Mount of Jupiter and runs across the hand. When the line is deep and clear the person is steady in their emotions, devoted, and reliable. When the line is thin or broken the individual is more fickle, sentimental, and changeable.

The Head Line is indicative of one's intelligence and ability to concentrate and focus. It begins under the Mount of Jupiter, close to the beginning of the Life Line. When the line is clear the individual can think clearly and concentrate and has a good memory. When the line is thin or broken, mental power is weakened and the individual may experience confusion and lack of focus. If the Head and Heart Lines combine, this is a Simian Line and indicates that the head and heart function as one, that thinking has an emotional quality to it.

The Life Line encircles the thumb in a wide arc. It provides information about an individual's vitality and ability to resist illness. It does not tell the length of one's life but records how long energy is a gift. When the line is deep and clear, the person's energy and recuperative ability is strong. When the line is thin or broken energy runs low and the ability to withstand illness is diminished.

The Saturn Line is also known as the Line of Security and the Line of Fate. It represents how secure the individual feels. This can be based on internal or external factors. The line begins near the wrist and runs upward toward the finger of Saturn. Every change in the line indicates a new cycle of life. When the line is deep and clear, the person feels secure and conditions are favorable for any undertaking. When the line is missing or defective, the person must work twice as hard. Many people who are "self-made" have no line of Saturn.

The Line of Apollo is also called the Line of Art or the Line of Recognition. This line appears rarely, but when it does it confers creative ability and the possibility of recognition in the person's chosen field. This line runs from the wrist upward toward the Mount of Apollo.

The Line of Mercury is also referred to as the Line of Health. This line appears in less than 50 percent of hands. One can have excellent health with or without this line. The Mercury Line describes certain distinct health issues mostly dealing with the digestive system and the liver. If it is deep and clear, it will confer good health and improve even a delicate Life Line.
