Withrow and MacEwen's Small Animal Clinical Oncology, 5e By Stephen J. Withrow DVM DACVS DACVIM (Oncology), Rodney Page DVM DACVIM (Internal Med/Oncology), David M. Vail DVM DACVIM (Oncology)

With a unique focus on the most effective interventional techniques, **Withrow & MacEwen's Small Animal Clinical Oncology, 5th Edition** tells the full story of cancer in dogs and cats ? what it is, how to diagnose it, and how to treat many of the most common cancers encountered in clinical practice. Nearly 500 color photographs, diagrams, x-rays, and gross views depict the clinical manifestations of various cancers. This edition covers the latest advances in clinical oncology, including chemotherapy, surgical oncology, and diagnostic techniques. With contributions from 65 veterinary oncology experts, this authoritative reference is a *must-have* for current, evidence-based therapeutic strategies on canine and feline oncology.

"I really love this book. If you are interested in veterinary oncology, have a flick through this book online or at a conference when you get the chance. I hope that you agree with me that this is the definitive oncology reference source for the early 21st century and that you feel compelled to buy it. Your patients will thank you for it." **Reviewed by:** Gerry Polton MA VetMB MSc(Clin Onc) DipECVIM-CA(Onc) MRCVS, UK **Date:** July 2014

- **Cutting-edge information on the complications of cancer, pain management, and the latest treatment modalities** prepares you to diagnose and treat pets with cancer rather than refer cases to a specialist.
- **A consistent format for chapters on body system tumors** includes coverage of incidence and risk factors, pathology, natural behavior of tumors, history and clinical signs, diagnostic techniques and workup, treatment options, and prognosis for specific malignancies.
- **A systems approach to the diagnosis and management of cancer** facilitates access to information about the many malignancies affecting small animal patients.
- **Nearly 500 color images** provide accurate depictions of specific diseases and procedures.

- **Helpful drug formularies** provide quick access to information on indications, toxicities, and recommended dosages for chemotherapeutic and analgesic drugs used in cancer treatment.
- **Expert contributors** provide in-depth coverage of the most current information in his or her respective specialty in veterinary oncology.
- **Chemotherapy protocols** are included when case studies prove clinical efficacy.
- **Discussion of compassion and supportive care for the management of pain, nutritional needs, and grief** includes methods for handling the pet's pain and nutritional complications as well as the pet owner's grief when treatment is not successful.
- **Thoroughly UPDATED chapters** cover the most recent changes in the clinical management of melanoma, mast cell tumors, tumors of the skeletal system, tumors of the endocrine system, tumors of the mammary gland, urinary cancers, nervous system cancers, lymphoma, and histiocytic diseases.
- **NEW *Clinical Trials and Developmental Therapeutics* chapter** discusses the various phases of clinical trials as well as current challenges and opportunities in oncology drug development.
- **NEW! A focus on the best recommended treatment options** highlights therapeutic strategies that have been vetted by veterinary oncology experts.
- **NEW co-author Dr. Rodney L. Page** adds his valuable perspective, expertise, and research experience.

Editorial Review

Review

"The book is nicely split into sections and then into chapters. It is easy to find what you are looking for, be it some background science and explanation regarding cancer therapies, or information on a more specific tumour type. The book begins with a discussion of the basic science and principles of oncology, including surgery, chemotherapy and radiotherapy. This is explained nicely but simply, and is well illustrated throughout...In summary, this book covers the main tumours in good depth; it is a useful reference for the basic principles of veterinary oncology and is certainly recommended for the practice bookshelf. The new edition provides new material that enhances its usefulness."

Veterinary Record, May 2013

"This book is the ideal companion for the vet wishing to understand disease and the best way to deal with it including communication to the client, complementary and alternative medicine and developmental therapeutics. A large part of the book remains focused on specific malignancies according their location."

Royal Canin, Vet's - Today, December 2013

"I really love this book. If you are interested in veterinary oncology, have a flick through this book online or at a conference when you get the chance. I hope that you agree with me that this is the definitive oncology reference source for the early 21st century and that you feel compelled to buy it. Your patients will thank you for it." **Reviewed by:** Gerry Polton MA VetMB MSc(Clin Onc) DipECVIM-CA(Onc) MRCVS, UK **Date:** July 2014

Users Review

From reader reviews:

Harold Cole:

Book is usually written, printed, or outlined for everything. You can recognize everything you want by a guide. Book has a different type. To be sure that book is important issue to bring us around the world. Close to that you can your reading proficiency was fluently. A book Withrow and MacEwen's Small Animal Clinical Oncology, 5e will make you to always be smarter. You can feel far more confidence if you can know about almost everything. But some of you think this open or reading some sort of book make you bored. It's not make you fun. Why they may be thought like that? Have you looking for best book or appropriate book with you?
