Compendium of Sorghum Diseases By Richard Frederiksen, Richard Frederiksen

Use the updated information and 122 color photographs in Compendium of Sorghum Diseases, Second Edition to prevent, diagnose, and control sorghum diseases. Major revisions were made in the sections covering ergot and diseases caused by Fusarium species. Up-to-date coverage on the recent advances made in sorghum diseases caused by viruses, bacteria and selected fungi is included. The section on abiotic diseases is particularly significant considering the extensive acreage of sorghum grown in poor soils and hot, dry climates

New developments covered in the second edition allows users to follow current pathogen terminology with the inclusion of updated smut fungi names and gain insight into the ongoing investigation of the taxonomic relations of fungi such as *Fusarium* spp. and *Colletotrichum* spp.

In addition to the comprehensive coverage of more than 60 diseases and disorders, this book includes a section on beneficial microorganisms associated with sorghum, and a ready reference to insect and mite problems.

Compendium of Sorghum Diseases, Second Edition is ideal for growers, crop consultants, plant scientists, extension specialists, educators, students, county agents and others interested in sorghum disease diagnosis and control.

Sorghum Diseases

Part I. Biotic Diseases

Diseases of Sorghum Caused by Prokaryotes

Bacterial Leaf Stripe

Bacterial Leaf Streak

Bacterial Leaf Blight

Bacterial Leaf Spot

Bacterial Top and Stalk Rot

Yellow Leaf Blotch

Diseases Caused by Fungi

Seedling Diseases

Foliar Diseases

Leaf Blight

Anthracnose

Gray Leaf Spot

Ladder Leaf Spot

Zonate Leaf Spot

Sooty Stripe

Rough Leaf Spot

Oval Leaf Spot

Tar Spot

Target Leaf Spot

Other Foliar Pathogens

Smuts and Rust

Head Smut

Loose Kernel Smut

Covered Kernel Smut

Long Smut

Rust

Downy Mildews

Crazy Top

Sorghum Downy Mildew

Root and Stalk Diseases

Anthracnose Stalk Rot

Fusarium Root and Stalk Rot

Fusarium Species Associated with Sorghum

Charcoal Rot

Pokkah Boeng (Twisted Top)

Milo Disease

Pythium Root Rot

Acremonium Wilt

Leaf Sheath Diseases

Banded Leaf and Sheath Blight

Zonate Leaf Spot on Leaf Sheaths

Southern Sclerotial Rot

Panicle and Seed Diseases

Grain Mold

Head Blight

Ergot

Storage Molds

Mycotoxicoses

Diseases Caused by Viruses and Viruslike Organisms

Potyviridae

Maize stripe virus

Maize chlorotic dwarf virus

Sorghum yellow banding virus

Furovirus

Sorghum chlorotic spot virus

Peanut clump virus

Rhabdoviridae

Sorghum stunt mosaic virus

Maize mosaic virus

Reoviridae

Geminiviridae

Other Viruses

Yellow Sorghum Stunt

Diseases Caused by Nematodes

Stunt Nematodes

Root-Lesion Nematodes

Root-Knot Nematodes

Other Nematodes

Parasitic Plants

Witchweed, *Striga* spp.

Part II. Abiotic Diseases

Nutrient Deficiencies and Toxicities

Water and Temperature Stresses

Genetic Disorders

Pesticide Injury

Part III. Beneficial Microorganisms

Vesicular-Arbuscular Mycorrhizae

Part IV. Insect Pests

Seed- and Root-Feeding Insects

Foliage-Feeding Insects

Stem-Boring Insects

Panicle-Feeding Insects

Part V. Controlling Sorghum Diseases

Methods of Control

Breeding for Disease Resistance

Disease Management
