**Elementary and Middle School Mathematics: Teaching Developmentally (Teaching Student-Centered Mathematics Series)** By John A. Van de Walle, Karen S. Karp, Jennifer M. Bay-Williams

*This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book.*

*Help all Pre-K-8 learners make sense of math*

Written by leaders in the field, *Elementary and Middle School Mathematics: Teaching Developmentally 9/e* helps teacher candidates develop a real understanding of the mathematics they will teach and the most effective methods of teaching Pre-K-8 math topics. This text reflects the Common Core State Standards and NCTM's Principles to Actions, as well as current research. Emphasis is placed on teaching math conceptually, in a problem-based, developmentally appropriate manner that supports the learning needs of all students. Pause and Reflect prompts and Activities engage pre-service teachers as they bolster their own knowledge of the math. Classroom videos and examples of real student work allow teacher candidates to visualize good mathematics instruction and assessment. An important reference to consult throughout a teaching career, this book helps teachers and their students experience the excitement that happens when math makes sense.

## **Editorial Review**

From the Back Cover

### **Help all Pre-K-8 learners make sense of math**

Written by leaders in the field, *Elementary and Middle School Mathematics: Teaching Developmentally* helps teacher candidates develop a real understanding of the mathematics they will teach and the most effective methods of teaching Pre-K-8 math topics. This text reflects the Common Core State Standards and NCTM's *Principles to Actions*, as well as current research. Emphasis is placed on teaching math conceptually, in a problem-based, developmentally appropriate manner that supports the learning needs of all students. Pause and Reflect prompts and Activities engage pre-service teachers as they bolster their own knowledge of the math. Classroom videos and examples of real student work allow teacher candidates to *visualize* good mathematics instruction and assessment. An important reference to consult throughout a teaching career, this book helps teachers and their students experience the excitement that happens when math makes sense.

### **Invigorate learning with the Enhanced Pearson eText**

This access code card provides access to the new Enhanced Pearson eText, a rich, interactive learning environment designed to improve student mastery of content with the following multimedia features:

- ***Embedded videos*** of mathematics teaching, learning, and assessing illustrate authentic, effective, teaching and assessment practices. Videos expand the topics presented in the text, and can be viewed independently or as a full class.
- ***Embedded Self-Checks*** with feedback to give readers a chance to test their knowledge of each section and chapter. The Self-Checks also increase student interactivity as they read.
- ***Activity Sheets and Blackline Masters*** are just a click away, making it even easier for instructors and students to use the Activities in the book. These classroom-ready handouts can be used in a methods class or school settings.
- ***Expanded Lessons*** focus on concepts central to elementary and middle school mathematics and include NCTM and CCSSO grade-level recommendations, adaptation suggestions for English language learners (ELLs) and students with special needs, and formative assessment suggestions. Every chapter in Section II has at least one Expanded Lesson linked to an Activity.

### **About the Author**

**John A. Van de Walle** was a professor emeritus at Virginia Commonwealth University. He was a leader in mathematics education who regularly offered professional development workshops for K–8 teachers in the United States and Canada focused on mathematics instruction that engaged students in mathematical reasoning and problem solving. He visited many classrooms and worked with teachers to implement student-centered math lessons. He co-authored the Scott Foresman-Addison Wesley *Mathematics K–6* series and contributed to the original Pearson School mathematics program enVisionMATH. Additionally, John was very active in the National Council of Teachers of Mathematics (NCTM), writing book chapters and journal articles, serving on the board of directors, chairing the educational materials committee, and speaking at national and regional meetings.

**Karen S. Karp** is a professor of mathematics education at the University of Louisville in Kentucky. Prior to entering the field of teacher education she was an elementary school teacher in New York. Karen is the volume editor of *Annual Perspectives in Mathematics Education: Using Research to Improve Instruction* and is the co-author of *Developing Essential Understanding of Addition and Subtraction for Teaching Mathematics in Pre-K-Grade 2*, *Discovering Lessons for the Common Core State Standards in Grades K-5* and *Putting Essential Understanding of Addition and Subtraction into Practice Pre-K – Grade 2*. She is a former member of the Board of Directors of the National Council of Teachers of Mathematics and a former president of the Association of Mathematics Teacher Educators. She continues to work in classrooms with teachers of students with disabilities.

**Jennifer M. Bay-Williams** is a professor of mathematics education at the University of Louisville in Kentucky. Jennifer taught elementary, middle, and high school in Missouri and in Peru, and continues to work in classrooms at all levels with students and with teachers. Jennifer has published many articles on teaching and learning in NCTM journals. She has also authored and co-authored numerous books, including: *Developing Essential Understanding of Addition and Subtraction for Teaching Mathematics in Pre-K-Grade 2*, *Math and Literature: Grades 6-8*, *Math and Nonfiction: Grades 6-8*, *Navigating through Connections in Grades 6-8*, *Mathematics Coaching: Resources and Tools for Coaches and Other Leaders*. Jennifer is on the Board of Directors for the National Council of Teachers of Mathematics (NCTM), and has previously served on the Board of Directors for TODOS: Equity for All and as secretary and president for the Association of Mathematics Teacher Educators (AMTE).

## Users Review

### From reader reviews:

#### Wilda Alexander:

Book is to be different for every single grade. Book for children until finally adult are different content. To be sure that book is very important normally. The book Elementary and Middle School Mathematics: Teaching Developmentally (Teaching Student-Centered Mathematics Series) was making you to know about other information and of course you can take more information. It doesn't matter what advantages for you. The guide Elementary and Middle School Mathematics: Teaching Developmentally (Teaching Student-Centered Mathematics Series) is not only giving you considerably more new information but also being your friend when you truly feel bored. You can spend your own spend time to read your publication. Try to make relationship using the book Elementary and Middle School Mathematics: Teaching Developmentally (Teaching Student-Centered Mathematics Series). You never feel lose out for everything in case you read some books.

#### John Davis:

In this 21st century, people become competitive in each way. By being competitive now, people have do something to make all of them survives, being in the middle of the crowded place and notice by surrounding. One thing that occasionally many people have underestimated this for a while is reading. Yes, by reading a guide your ability to survive improve then having chance to remain than other is high. For you who want to start reading any book, we give you this specific Elementary and Middle School Mathematics: Teaching Developmentally (Teaching Student-Centered Mathematics Series) book as basic and daily reading guide. Why, because this book is usually more than just a book.

**Lidia Flynn:**

Now a day folks who Living in the era exactly where everything reachable by connect to the internet and the resources in it can be true or not need people to be aware of each facts they get. How individuals to be smart in having any information nowadays? Of course the reply is reading a book. Reading a book can help folks out of this uncertainty Information especially this Elementary and Middle School Mathematics: Teaching Developmentally (Teaching Student-Centered Mathematics Series) book because book offers you rich info and knowledge. Of course the knowledge in this book hundred per-cent guarantees there is no doubt in it as you know.

**Crystal Thomas:**

That book can make you to feel relax. That book Elementary and Middle School Mathematics: Teaching Developmentally (Teaching Student-Centered Mathematics Series) was bright colored and of course has pictures on there. As we know that book Elementary and Middle School Mathematics: Teaching Developmentally (Teaching Student-Centered Mathematics Series) has many kinds or genre. Start from kids until teens. For example Naruto or Detective Conan you can read and believe that you are the character on there. Therefore , not at all of book are usually make you bored, any it offers up you feel happy, fun and chill out. Try to choose the best book to suit your needs and try to like reading in which.
