One Well: The Story of Water on Earth (CitizenKid) By Rochelle Strauss

Seen from space, our planet looks blue. This is because almost 70 percent of Earth's surface is covered with water. Earth is the only planet with liquid water -- and therefore the only planet that can support life.

All water is connected. Every raindrop, lake, underground river and glacier is part of a single global well.

Water has the power to change everything --- a single splash can sprout a seed, quench a thirst, provide a habitat, generate energy and sustain life. How we treat the water in the well will affect every species on the planet, now and for years to come. One Well shows how every one of us has the power to conserve and protect our global well.

One Well is part of CitizenKid: A collection of books that inform children about the world and inspire them to be better global citizens.

Editorial Review

From School Library Journal

Grade 4–6—Looking at all the water on Earth—in the atmosphere, the oceans, lakes, ponds, rivers, and rain as "One Well" into which all life dips to survive—Strauss presents a timely discussion of the use and abuse of a not-so-limitless resource. Liberally sprinkled with interesting facts—"It took about 130 L (34 U.S. gal.) of water to make your bike"—the readable text informs children of growing demands on a finite supply; increasing pollution; and the intensifying urgency for the conservation, preservation, and protection of a unique chemical combination more essential to all life than the air we breathe. Woods's delicate paintings keep perfect step and provide a gentle framework for the plentiful statistical snippets. Included is a section for children on "Becoming Well Aware," and notes for adults about helping youngsters (and themselves) to consider the quality and quantity of the water passing through their lives. Oversized, slim, and with an interesting slant.—*Patricia Manning, formerly at Eastchester Public Library, NY*

Review

...encourages children ages 7 and up to think about the power we each have to initiate positive changes in the world. *?Breitbart*

This beautifully illustrated and wonderfully written book should be read and acted upon by every family member. I hope that it will be available in every school library in the world. The message it brings is critical to all humans and indeed all life on the planet. *?Charles Hopkins, United Nations University Chair for Education for Sustainable Development, York University*

The facts are as dramatic as the threat of loss. *?Booklist, Starred Review*

One Well is a much needed drink for those of us thirsting to help protect our planet's threatened water supplies. Appropriate for children of all ages, this richly illustrated book provides valuable perspectives on the sources of water, value to all living things, present threats and constructive suggestions for water conservation. Bravo to Ms. Strauss and Ms. Woods for a valuable contribution to a subject vital to us all. *?Jean-Michel Cousteau, Founder and President Ocean Futures Society, Inc.*

One Well fills a huge void...This beautifully illustrated and superbly written book is exactly the tool needed to bring awareness of the life-giving importance of water to a whole new generation. *?Maude Barlow, Chair, Council of Canadians, Author of Blue Gold*

About the Author

Rochelle Strauss is an environmental education consultant in Toronto. She has designed and developed education programs, as well as consulted on numerous environmental projects, including a biodiversity museum in Panama and a national park in Canada.
