A unique, comprehensive guide to creating custom apps with VBA

Automating computing tasks to increase productivity is a goal for businesses of all sizes. Visual Basic for Applications (VBA) is a version of Visual Basic designed to be easily understandable for novice programmers, but still powerful enough for IT professionals who need to create specialized business applications. With this invaluable book, you'll learn how to extend the capabilities of Office 2013 applications with VBA programming and use it for writing macros, automating Office applications, and creating custom applications in Word, Excel, PowerPoint, Outlook, and Access.

- Covers the basics of VBA in clear, systematic tutorials and includes intermediate and advanced content for experienced VB developers
- Explores recording macros and getting started with VBA; learning how to work with VBA; using loops and functions; using message boxes, input boxes, and dialog boxes; creating effective code; XML-based files, ActiveX, the developer tab, content controls, add-ins, embedded macros, and security
- Anchors the content with solid, real-world projects in Word, Excel, Outlook, PowerPoint, and Access

Covering VBA for the entire suite of Office 2013 applications, *Mastering VBA for Microsoft Office 2013* is mandatory reading.
